EDUCATION

University of Montevallo

Montevallo, AL

Honors Bachelor of Science in Computer Science, Minor in Mathematics

Aug. 2021 - May 2025

Relevant Coursework: Introduction to Computer Science, Computer Programming I (Python), Object-Oriented Programming, Calculus I, II, III, Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Programming Languages, Software Engineering

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, SQL, Python, C++, HTML/CSS

Frameworks & Libraries: React, Node.js, Flask, Express.js, Spring Boot, Material-UI, TailwindCSS, Bootstrap, Next.js, Pandas, NumPy, Matplotlib, scikit-learn, SciPy, Tensorflow, pyTorch

Developer Tools: Git, SQLite, PostgreSQL, LaTeX, Figma, VS Code

EXPERIENCE

Software Development Intern

June 2023 — July 2023

Solera, Inc.

Westlake, TX

- Designed and implemented an interactive dashboard using **React.js**, creating modular and reusable components, which reduced development time for new features by 40% and ensured scalability across the application.
- Integrated data visualization libraries (**D3.js**) to transform complex datasets into dynamic and visually engaging insights, leading to a 30% increase in user engagement.
- Developed optimized **Microsoft SQL Server** queries to extract, filter, and aggregate data, reducing data retrieval time by 50% and encapsulated them into stored procedures to enhance code consistency and reusability.
- Streamlined API interactions using **Axios** to fetch, parse, and transform backend data, ensuring seamless integration with front-end components and improving application responsiveness.
- Delivered a comprehensive, interactive analytics platform that provided stakeholders with real-time insights, maximizing the value of existing company data and improving decision-making efficiency.

PROJECTS

SPAZ | *Next.js, React, JavaScript*

February 2024 - May 2024

- Developed a web application using **Next.js**, **TailwindCSS**, **JavaScript** that provides users insights into their Spotify listening patterns
- Utilized Spotify's API to access user's data, requiring user authentication via **OAuth2.0**

Buy-N-Sell | *Next.js, React, Prisma, PostgreSQL*

March 2024 - April 2024

- Developed a robust e-commerce platform with **Next.js** and **React**, featuring user authentication, order processing, and secure payment transactions
- Designed and implemented an intuitive admin interface for product management, allowing the addition, update, and deletion of products through a streamlined workflow
- Utilized **Prisma** and optimized **PostgreSQL** queries to manage user and product data efficiently, ensuring high performance and data integrity

Soccer stats | *Next.js, React, TypeScript, TailwindCSS*

May 2024

- Developed a dynamic soccer statistics web application using **Next.js**, featuring comprehensive views of clubs, players, and head-to-head comparisons, with real-time data fetched from external APIs
- Implemented server-side rendering (**SSR**) and static site generation (**SSG**) to enhance performance and SEO, ensuring a fast and responsive user experience
- Designed and built reusable, responsive UI components with **React**, leveraging modern **TailwindCSS** techniques to create a visually appealing and user-friendly interface

Housing Predictions Project | *Python, Scikit-learn, SciPy, NumPy, Matplotlib, Pandas*

April 2024

- Created a predictive system for California housing costs using a comprehensive dataset, leveraging **Pandas** for data manipulation and preprocessing
- Optimized the **Random Forest regressor** model through hyperparameter tuning, achieving highly accurate housing price predictions
